The importance of developing rapport with patients cannot be overemphasized. Effective communication skills are a critical tool that assists the physician in establishing that optimal patient rapport. Physicians need to keep in mind that today's health care consumers, particularly those in the baby boomer and younger age groups, have much more medical knowledge than senior citizens. Both young and old, however, often judge the quality of care received on the basis of the physician-patient interaction. Certainly, the physician's skill and reputation play an important role in a patient's confidence. However, many if not most patients assume that physicians have the requisite technical skill to treat their medical problems. From the patient's perspective, therefore, what separates the adequate or average physician from the truly great physician is how well the physician practices the "art" of medical care, conveying those highly valued human skills of compassion and caring concern that patients seem to need so much.

All too often, when physicians do not communicate caring concern, especially when the care is painful, difficult, or results in less-than-optimal outcomes, an inevitable cycle of miscommunication occurs among patient, family, and physician. Under these circumstances, patients who express their anger and frustration may cause the physician to react defensively in a way that may be perceived as hostile or arrogant. Most often it is this response that causes the patient to seek the advice of an attorney, because poor communication between a physician and patient can lead an already angry, dissatisfied patient to believe the care was poor even when it was entirely appropriate (5). In the arena of physician liability, the burden of "successful" patient-physician communication lies with physicians (5). That is not to say that patients do not share the burden, but society and the courts have deemed that physicians have the ultimate responsibility for initiating, clarifying, facilitating, documenting, and reinforcing discussions related to their patients' condition, treatment, and prognosis (5).

I AM DOING ABSOLUTELY NOTHING WRONG!

TO SECURE A DOCTOR WHO CARES IS IMPORTANT BUT I WILL NOT COMPROMISE - I WILL NOT COMPROMISE - I WILL NOT COMPROMISE – TO MY DEATH IF THAT BE!

Please do not insult my intelligence to attempt to declare some kind of agnotology on this subject!

For that is not the methodology that would be of the "best big think" minds view -- that can not actually respond to this view truth challenge.

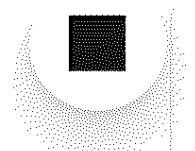

What are you going to do?

You just going to allow me to die from HIV / AIDS Disease because not one of my rotations of assigned medical care providers assigned to my medical record [ Humana / Prospect Medical Group ] can actually risk having a real honest patient-centered communication exchange.

To form a trust in a spark of starting to carry on of a real physician / patient relationship - that does not break from the pressures of the truth that must be able to be open - open - open topics to patient say into the air of any time - and in any way -- whatever that is -- such a "words" of speaking tone, can not be that which ruins the provider services permanently!

Unilaterally - unjustly -- and in fact against the fiduciary responsibility of the doctor's side of irrational reactive choices!

I am left to fend for myself --  
in a sea of a very disturbing reality.

I did not unhide it -- but it is unhidden anyway. That being, I would assume, the "human interaction" of confirmation that "Big Think" received the full and complete understanding of this messaging.

I do have money in my bank -- and I can if I need to pay for services without insurance - but then again, I am not going to pay for services that are truly a waste of time - the theme of your program here.

I am very serious, I have never heard of you and this video [ I am still listening to ] is primarily a topic targeted at a life-partner relationship. That is not the relationship I have problems with. And the fact of things that you can indeed find online as reality-based understanding, the whole spectrum of reality is a bit hard to first describe.

There are actually now 3 separate research finding papers as of April 6th, 2020 on the National Institutes of Health [ HTTP://nih.gov ] -- The first appearing research on the government site, is a complete reversal and re-positioning of this subject that was first appearing from a published BUNK SCIENCE of AGNOTOLOGY OF 2015 from Dr. Loraine Sheridan.

In court, if need be, the family dynamic - and I might as well throw in everyone who is in the view of a real story - to be at a fault for that court case of the century. My needs are not the court, but I need to have doctors who actually treat my conditions and they refuse to be doctors who care to communicate with me.

Absurd you can carry on this way. To whom you do this ignore mode to silence your patients or only me does not matter.

Taking into the real family dynamic, noted into the actual mental health history now put into this record, something might click in you. To respond practically upon a changing doctor. This tool is a dual aspect and so far it is being misused on your side of this exchange.

On Facebook Messenger [ generally considered a private tool ], the communication exchange with my mother is public here:

Great 🙌. So much clarity 🧠 and very helpful. I can see how far I have come and where I am now. I started Transcendental Meditation in 1985. I found that this helped me to become stronger from within. I was also being with people who were of a good vibration and this helped me on my way with healing. I still do Transcendental ...

Yesterday Was my birthday. Had I not told her, she wouldn't have even known it. I didn't even get a video call, a birthday dinner invite or anything. just a "LOL HAPPY BIRTHDAY." If someone rarely tells you they love you and their actions says otherwise you know it's not true. The only thing I did wrong was fall for a cold hearted user. Im done.

Great video and points! Anyone does not believe in marriage need to get a reality check. Marriage is real. I rather be with a guy who is more established in almost everything like care, place, career or business, rich but I do not need his money, etc. I also rather be with a guy who is single and interested in dating, marriage and children like me.
